Pet tracker

Finding your pet has never been this easy

“A dog is the only thing on earth that loves you more than he loves himself.”
— **Josh Billings**

Our Pet tracker

Latest GPS technology

With our pet tracker you will never have to spend another second worrying about where your pet is. The latest GPS technology accurately pinpoints your pet on Google Maps within a minute, while competitors' trackers are still starting up. By activating the continuous track mode you'll get more frequent update intervals, making it even easier to find your pet.

Open source web application

The user-friendly web interface is available for all internet compatible devices on the market. By not developing different mobile applications for different operating systems, we reduce the development costs as well as the final cost of the product.

Great fit and flexibility

The device fits a wide range of collar sizes and can also be attached to belts or other human clothing

Durable and lightweight module

Your pet should not be burdened by a heavy and bulky module with pointy antennas. The durable exterior of our product is made to withstand all possible weather conditions while not limiting the features.

About us

European quality

The team behind the tracking system has come together from top Universities of Applied Sciences within Europe, stretching from the warm beaches in Portugal to the frozen grounds of Finland.

Different cultures, many ideas

Curious of what our main strength is? The answer is simple and easy – diversity! This magic thing, provide our team with different engineering approaches to issues and finally resulting in best solutions to given problems. We are the synonym of modern, international cooperation, so... let us prove it!

Why us?

Pet Tracker is best suited to the needs of the customers. Basing on the surveys and on our own experience, we offer a friendlier alternative to existing so far similar products.

What makes it so **special**?

- general accessibility
- ease of everyday use
- not sophisticated system

Do not hesitate - find out today how safe and convenient “keeping an eye” on your dog is.
