PET TRACKER

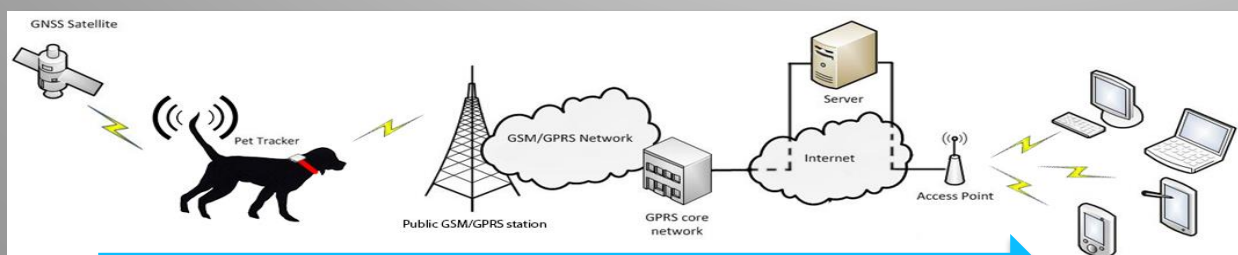

FINDING YOUR PET HAS NEVER BEEN THIS EASY

Real-time tracking device for animals

With our pet tracker you will never have to spend another second worrying about where your pet is. The latest GPS technology, combined with GSM technology, accurately pinpoints your pet on Google Maps within a minute, while competitor's trackers are still starting up.

A healthy pet is a happy pet

Concerned about your pet's health? The pet tracker records the activity of your pet during the day, calculate and ranks the activity and then shows it on your personal webpage to give you a good overview if your pet has received enough exercise to stay healthy.
